CMQ ENGINEERING USA

Cement Storage Silos

88 ton cement storage silos. Center silo features dual outlets

132 ton dual outlet cement silos feeding cement weigh hoppers.

CMQ Engineering manufactures storage silos for cement and fly ash with capacities ranging from 55 tons to 240 tons.

Large capacity silos up to 900 tons are also available.

CMQ's chisel nose design of the silo allows mass flow discharge and guarantees first material in-first material out – without balling or blockages.

Features:

- A domed and sloping lid to alleviate water ponding.
- Internal ladder.
- Cam lever quick release inspection hatch 24" with safety grill.
- Top handrails.
- Internally fitted 2" drain pipe from the silo lid.
- 4" fill pipe internally mounted and tangentially set to create a cyclone effect.
- Fill pipe extensions.
- An airslide to run the full width of the silo.
