

Manufacturer of Concrete Batching, Mining, & Quarrying, Blending & Asphalt Equipment

Mobile cement silo and hopper

Rear view configured for transport

CMQ manufactures a mobile silo with a **loss of weight hopper** for discharging into an asphalt mixer/ pugmill or **cement weigh hopper** for batching concrete. The plant can be towed by a standard prime mover. There is no requirement for craneage for mobilisation and demobilisation.

Features:

- Mobile cement storage silo 75T capacity with reverse pulse filter with overflow protection.
- Sliding shut-off plate above the horizontal screen allows the screen to be emptied for transport and maintenance with product remaining in the silo.
- Loss of weight cement powder system to an accuracy of operation to within 0.5%.
- Discharge screw 250mm dia. feeds product into the mixer.
- Lockable motor control centre.
