

Manufacturer of Concrete Batching, Mining, & Quarrying, Blending & Asphalt Equipment

80T cement storage silos. Centre silo features dual outlet

120T dual outlet cement silos feeding cement hoppers

**CMQ designs and manufactures storage silos with the capacity of 50T to 200T GP cement.**

**Large capacity silos up to 850T GP cement also available.**

CMQ's chisel nose design of the silo allows mass flow discharge and guarantees first material in - first material out - without balling or blockages.

**Features:**

- A domed and sloping lid to alleviate water ponding.
- Internal ladder.
- Cam lever quick release inspection hatch 600mm with safety grill.
- Top handrails.
- Internally fitted 65mm drain pipe from the silo lid.
- 100mm fill pipe internally mounted and tangentially set to create a cyclone effect.
- Fill pipe extensions.
- An airslide to run the full width of the silo.
