

Weigh hopper in working position

CMQ's stand-alone aggregate weigh hopper has an additional transit mixer feed chute.

The additional bin for the Portabatch increases the production rate.

Features:

- » Low profile aggregate weigh hopper, 15T capacity on shear beam load cells.
- » No loader ramp required.
- » Digital indicator for loader driver to view.
- » 900mm wide conveyor folds downwards for travelling.
- » Electricals – steel wire armoured.

Weigh hopper configured for transport

CMQ's free-standing cement weigh hopper with fork lift tyne slots is mounted on shear beam load cells on a skid base support frame (split for transport), complete with discharge auger and ranger digital indicator.
